“GOOD DESIGN MEANS NOT JUST FINDING THE RIGHT FORM, BUT FINDING THE RIGHT FORM AT THE RIGHT TIME.”

Achim Pohl, CEO and professional designer from ARTEFAKT design GmbH & Co. KG, Germany

The bathroom has advanced to become a significant part of our living space. It provides for relaxation, wellness and hygiene – and it is where we find time for ourselves. To make the time you spend in your bathroom something special for yourself, Viega offers a broad palette of designs. This brochure provides you with an overview of the results. We hope you enjoy discovering the various possibilities and trends for your new bathroom.

Bathrooms are as versatile as their users. And that is why Viega offers flush plates that go with the current ceramic and tile trends in all kinds of bathroom worlds: from emotional to rational, from straightforward to extravagant, as a haptic experience or touchless.

At the same time, our designer flush plates fulfil all the demands you may make on them, without leaving you unable to decide – never mind whether a new construction or a refurbishment are involved.

Our inspiration

From the design metropolis straight into your bathroom: We regularly look for inspiration in worldwide trends so that we can offer you contemporary and interesting designs. **from page 6**

Trend bathroom 1: Modern with technical ingenuity

Do you find the best is the minimum that you accept? You prefer clear lines, superior materials and individual, perhaps even daring design? Visign for More provides exclusive flush plates for the most metropolis tastes. **from page 8**

Trend bathroom 2: Uncomplicated reduced

Where things come together that belong together: With Viega Visign, you can design your bathroom with all generations in mind and so that it can be modified at any time – through timeless design and quality that spans the generations. **from page 22**

Our inspiration

FROM THE DESIGN METROPOLIS STRAIGHT INTO YOUR BATHROOM.

New bathroom trends arise from living trends. That is why we look to the creative hotspots of the world to get inspiration when developing our flush plates. For that is the only way to obtain the perfect fusion of timeless design classics and fashionable must-haves.

From low-key trends such as the Nordic style featuring tone-in-tone designs to an exuberant-glamorous style that makes the best of sharp contrasts. Or perhaps rather back to nature, with warm colours and mellow materials? Never mind which trend you choose – the Visign flush plates will suit your needs perfectly.

Trend bathroom 1

MODERN WITH TECHNICAL INGENUITY.

You design your bathroom as a living space and use state-of-the-art technology as your inspiration. While making sure that high-quality materials, design, haptic of an equally high standard with no compromises in any area, including the flushplate. Visign for More is at home in any bathroom surroundings, providing highest levels of functional safety, ease of use and unique living comfort.

Unobtrusive or striking?

Choose either a bold eye-catcher or a discreet plate that captivates with its unassuming design.

Soft touch

Viega designer flush plates make for an intriguing haptic experience. They positively invite one to touch them – even when it's not necessary.

Brighten things up with colour

Fittings in unusual colours are fast becoming an in-demand furnishing feature. So with a view to harmonious bathroom design, you can choose between a variety of actuation and urinal plates in individual metallic and special colours.

Light as a design element

PUT SOME SHINING ACCENTS IN YOUR BATHROOM.

Lighting plays a key role in bathroom design. For the effects of colour can positively influence bathroom users' moods. That is why Viega is emphasizing this aspect, too: Many electronic flush plates can optionally be equipped with an LED frame that actuates at close range (approx. 3 m). The pleasant light serves as a guide and for functional illumination in the dark, yet is discreet enough to not compete with the bathroom lighting.

The image shows two vertical panels of dark wood-grain material, possibly laminate or veneer, placed side-by-side. The wood grain is a dark, almost black, with fine, light-colored horizontal lines. The right panel has the word 'viega' printed in a light, sans-serif font in the upper right corner. The panels are set against a plain white background.

viega

Visign for More 200

BACK TO NATURE.

Wood is natural, wood is warm, wood exudes quality of life. Not only through its appealing appearance and haptic properties, but also through its positive effects on the room's ambience.

With the Visign for More 200 flush plate made of stained oak you can achieve a perfect counterpart to wood-accented walls. The two flush plate sections have a matching grain, and each flush plate is genuinely unique.

But Visign for More 200 is an optical highlight not only when it is made of real wood. The two glass variants give a sense of floatation and radiate a special air of lightness and flair. In contrast, the colours such as metal cooper/gold- coloured and metal black matt each make an unmistakable statement. Together, this means that Visign for More 200 flush plates can satisfy whatever design ideas you may have.

Visign for More 201

A LIKING FOR LUXURY.

Distinctive design, lasered from a single piece of metal: This is the new, electronically operable Visign for More 201 flush plate – made of stainless steel brushed. The extremely thin plate fits any high-quality wall furnishing, optionally at tile level or with an LED frame. The plate protrudes slightly towards the user, while the buttons incline further forwards. This lends the plate a clear-cut visual and haptic accent.

Visign for More 202

A REAL HIGHLIGHT.

The Visign for More 202 turns the WC flush round. Well, to be exact: It turns the usual press operation into a rotation. The organic design with LED illumination invites you to try it out – and even tempts you not to let go. The prominent, rotating knob represents a bold antithesis to today's dominant flat designs – and underlines this with tile-level installation if desired. The electronically actuated flush goes ideally with organic architecture and patchwork bathrooms in retro-styled room themes. The colour scheme also leaves no wishes unfulfilled: The individual paintwork is available in many different special colours.

Visign for More 204

COOL UNDERSTATEMENT.

Flushing buttons are round as a rule. Which means it's high time to create some exceptions to the rule, says Viega. The results are a visual invitation to touch: The new Visign for More 204 dispenses with traditional round buttons in favour of a bar that only needs a light touch – a little longer for the main flush and just briefly for the smaller flush volume.

The slim bar made of brushed stainless steel looks almost like a lapel pin on the wall – very decorative and with electronic actuation for a specially elegant flair. Illumination is also possible with the optional LED installation frame.

Visign for More 205 sensitive

TOUCH THE FUTURE.

Always hygienic, perfectly smooth, easy to clean and with electronic actuation. Install the future in today's bathroom: The new Visign for More 205 sensitive provides for touchless flushing convenience at its best. The chrome frame with the black glass element is a symphony of effortlessness and brilliance. To actuate the flush, just hold your hand close to the function you want. This is indicated by means of a grid of illuminated points when you approach to within 3 metres.

That means you benefit from maximum flushing convenience, while also distancing yourself from germs and bacteria.

Sensitive Glass black

Trend 2

UNCOMPLICATED REDUCED.

Life means change. So it's a good thing if your bathroom can adapt to the needs of all the residents: with height-adjustable WCs and washbasins that respond to both the tall and the short. With a timeless appearance that won't look like yesterday's style tomorrow. And tried-and-tested Viega quality that lasts for generations.

With Visign flush plates you can introduce modern flushing convenience to multi-generation bathrooms – while catering for the whole range of different tastes.

viega

Visign for Style 20

ROUNDED OFF.

Good design and balanced contrasts are inseparable. Which is why this classic of design plays with round flush buttons set in a rectangular geometry. The button for the main flush is slightly convex, while the button for the small volume is concave. Because that has proved so popular with our customers, we have gone even further to improve the attractiveness of the flush plate, with sharper contours, a better haptic experience and modified technology. The very slim plate has a construction depth of only 8 mm, so it can be integrated into any wall design at tile level by means of an installation frame if desired. Discover a timeless classic in a new look.

Visign for Style 21

CLEAR CUT.

Robust, understated, clear – that is Visign for Style 21. The different widths of the flush buttons generate visual tension that is compensated by the uniform widths of the vertical margins. With a construction depth of just 8 mm, this minimalist design leaves no room for ambiguity and feels at home in any puristic bathroom surroundings such as a Bauhaus-inspired style. For especially smooth integration, this design is also available for tile-level installation.

A rectangular metal plate with rounded corners and a brushed metal finish. The plate features two horizontal slots with rounded ends, one on the left and one on the right. The brand name 'viega' is printed in the top right corner.

viega

Visign for Style 23

SLIMLINE.

Bathroom design is moving towards softer geometric shapes in addition to the classic rectangles: Visign for Style 23 reflects this with longitudinally oval flush buttons, more rounded edges or a chrome-plated frame, reminiscent of a smart-phone, that makes the plate appear to float in front of the wall. It is available in eight colours – as desired tone-in-tone or in a contrast-rich bichromatic version – and additional colours on request.

Visign for Style 24

THE MIDDLE WAY.

Strict geometry in perfect combination with a gentle feel – Visign for Style 24 is an aesthetic exclamation mark in any bathroom. The centrally placed, vertical buttons stand out from the crowd of traditionally horizontal button arrangements. You can accentuate your particular taste even more with the bichromatic versions. With an optional tile-level installation, Visign for Style 24 enhances any bathroom design.

Visign for Style 25 sensitive

TOUCHLESS ELEGANCE.

Appealingly contradictory: The shape is an invitation to touch it. But the intelligent illumination architecture makes clear: no need! The after-glow paint charges itself during the day from natural and artificial sources of light so that it glows in the dark and provides for orientation without the need to switch on the light. The shape and finish of the electronically actuated plate remind one of a smartphone, while the grid of illuminated points is more reminiscent of a modern multi-media screen. The clean white-look underlines the maximized degree of hygiene that you achieve with this bathroom highlight.

Sensitive Plastic white alpine

Visign for More 200 and Visign for Style 23

SMARTLY REMOTE.

Whether from round the corner, from the opposite wall or from a piece of furniture nearby: With Visign for Style 23 and Visign for More 200 you actuate the flush wherever it is most convenient – and at the same time you benefit from maximum design flexibility.

Visign for More 200: High-end design

Visign for More 200 makes its point with a subtle elegance and black or white glass.

Visign for Style 23: Visign for Style 23 fits unobtrusively in any wall or furniture item.

The longitudinally oval double flush button integrates harmoniously into the rectangular frame. The low and high flush volumes are indicated by pressure points.

Intelligent details for your bathroom

NOW INCLUDED AS STANDARD: YOUR LINK TO THE FUTURE.

Visign flush plates stand out not only on account of their appearance, but especially because of the intelligent technology behind them.

Hygiene function

When water pipes are not used for a long period of time, bacteria may grow in the water. To make sure precisely that doesn't happen, all electronic flush plates with the hygiene function can be programmed to actuate flushing with freely selectable time intervals and volumes. So you can be sure that the water coming out of the pipes is always clean, also in rarely used bathrooms.

Tablet holder for cleaning tabs

Always fresh: The Viega tablet holder, compatible with all the WC flush plates in this brochure, makes for continuous freshness without unattractive WC deodorizer blocks. Simply open the flush plate and insert the recommended cleaning tab – it will dissolve completely.

LED frame

Smart highlight: Many electronic flush plates can be enhanced by means of a pleasant ambient light with the aid of an extra component – as an aid to orientation in the dark. This is especially recommendable for Visign for More 201 and Visign for More 204.

Tile-level installation

Smooth advantage: Many Visign urinal and WC flush plates are suitable for tile-level installation. This creates a harmonious unity of form, function, surface and plate.

Touchless flush actuation

The two flush plates for Visign for More 205 sensitive and Visign for Style 25 sensitive guarantee maximum levels of hygiene – and no fingerprints. The smooth surface is extremely easy to clean.

Fully compatible

All Viega flush plates are compatible with Prevista cisterns. That means that you can easily install something else if your preferences or bathroom style change. And there is also no need to worry about wear and tear: Each plate is tested for a service life of at least 25 years.

Individual design

Our designer flush plates enable you to design your bathroom as individually as you like. We will be glad to supply you with any information you need regarding individual colours and finishes on request.

Urinal flush plates

THE PERFECT DESIGN ENHANCEMENT FOR YOUR BATHROOM.

Coordinated design is an important factor when it comes to configuring a bathroom. That is why we supply Viega urinal flush plates that go perfectly with your WC flush. Which means that there are no limits to your design ideas. And that includes the colours: We can also provide individual paint or metal finishes for your flush plates on request.
